### ***Allowable Subject Matter***

2. Claim 1-21 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to an apparatus for scheduling flexibly integrated guaranteed-bandwidth and best-effort flows. The prior arts in the record fail to teach or make obvious to a method comprising the service provided to each backlogged GB data packet flow being limited to its guaranteed bandwidth requirement even when the backlog at that backlogged GB data packet flow exceeds its guaranteed bandwidth within a structure of the claim. These features are claimed in the independent claims 1 and 21 and render them allowable. The prior arts in the record also fail to teach or make obvious to an apparatus comprising the duration of the second subframe is derived from a BE running share which is defined as the difference between a fixed service rate and the sum of the guaranteed bandwidth requirements of each of the GB flows that have a backlog in respective ones of the plurality of queues within a structure of the claim. These features are claimed in the independent claim 11 and render it allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
